Education

S.R.M University — Modinagar, UP
Master Of Computer Application — *May 2022 – June 2024*

G.D Goenka University — Sohna, Haryana
Bachelor Of Computer Application — *May 2019 – Aug. 2022*

Experience

Transport Co-operation Of India (SDE-1) — September 2025 – Present
Full Stack Developer — React, .NET, Oracle

TCI Seaways — Data and Forms Automation

- Engineered backend stored procedures to retrieve and insert operational data into database tables, supporting core data operations across the module.
- Created RESTful .NET APIs using MVC architecture to handle GET and POST requests between the React frontend and backend procedures.
- Crafted an interactive React-based frontend, replacing manual workflows with a faster form-driven user interface.
- Delivered 100+ report and transaction pages supporting operational workflows and business processes.
- Added voucher functionality to support business transaction workflows.
- Integrated Excel bulk-upload functionality to process 250+ container records in a single operation, streamlining container data entry.
- Enabled users to retrieve and download container details through Excel for operational reporting.

TCI Concor — Database Migration and Delay Analytics

- Migrated the complete application codebase and data layer from PostgreSQL to Oracle SQL while maintaining data integrity and system stability.
- Diagnosed and resolved performance and functional issues across 10 .NET pages, improving application reliability.
- Engineered 3 interactive .NET ASPX dashboards used by 10 Business Analyst team members to track and visualize delivery delays.
- Provided the Business Analyst team with real-time visibility into delivery bottlenecks through dashboard reporting.
- Produced report pages supporting business reporting and operational analysis.
- Integrated Excel-based data retrieval, enabling users to extract detailed information for offline analysis.

TCI Yard Management System — Remote Yard Monitoring and 3D Visualization

- Engineered backend stored procedures for real-time data retrieval and insertion supporting yard operations.
- Connected React frontend and backend procedures through RESTful .NET MVC APIs for live data synchronization.
- Crafted an interactive, cloud-accessible React frontend allowing authorized users to remotely monitor yard status.
- Created a 3D visualization module for container allotment and yard information, replacing manual tracking with real-time spatial visibility.
- Enabled monitoring of containers entering and leaving the yard.
- Displayed container status across empty, loaded, and under-maintenance categories.
- Exposed information about items stored inside loaded containers.
- Enhanced operational awareness by visually presenting container placement, movement, and status.

NBCS Technologies April 2025 – August 2025

Full Stack Developer — React, .NET, Oracle

- Conducted end-to-end application testing to validate functionality, performance, and compliance with business requirements.
- Managed detailed JIRA tickets covering bug tracking, feature requests, and development tasks.
- Collaborated with development and QA teams to investigate and resolve technical issues.
- Engineered frontend interfaces using React and Redux for centralized state management.
- Created RESTful APIs using Node.js.
- Connected Node.js APIs with MongoDB for data persistence and integrated backend services with React applications.

Internship Experience

React JS Intern June 2024 – March 2025

Future Algorithm

- Completed a 10-month internship focused on **React.js** and modern frontend development technologies.
- Developed responsive and reusable **UI components** using React.js and related frontend technologies.
- Implemented frontend functionality and contributed to improving user interfaces and overall user experience.
- Collaborated on frontend development tasks while gaining hands-on experience with modern web development practices.
- Demonstrated strong dedication, problem-solving skills, and adaptability while learning new technologies and development methodologies.

Projects

HungryHeart — E-Commerce Platform | *React, Node.js, Express.js, MongoDB, JWT* | Live Website

- Engineered and launched a full-stack e-commerce platform using the MERN stack for managing products, customers, carts, and orders.
- Secured user authentication through Email OTP verification and JWT-based authorization for protected sessions.
- Created product browsing, cart management, checkout, and order placement workflows.
- Architected RESTful APIs with Node.js and Express.js and connected them with the React frontend.
- Structured MongoDB data models for users, products, carts, and orders.
- Launched the application as a production website with responsive support for desktop and mobile users.

WorkFlowX — Inventory & Order Management System | *React, TypeScript, .NET 8 Web API, EF Core, Oracle SQL*

- Engineered a full-stack inventory and order management platform using React, TypeScript, and .NET 8 Web API with modules for products, inventory, orders, and analytics.
- Structured a layered backend architecture using Request/Response ViewModels, Controllers, Service Interfaces, Services, Repository Interfaces, and Repositories to maintain separation of concerns.
- Established JWT authentication and role-based authorization for Admin, Manager, and Employee access levels.
- Leveraged Entity Framework Core for database operations, LINQ-based querying, entity relationships, and asynchronous CRUD operations with Oracle SQL.
- Containerized the application using Docker and released the frontend and backend AWS Elastic Beanstalk. for production use.

Technical Skills

Languages: JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Technologies: React.js, ASP.NET Web API MVC, Node.js, Express.js
Databases: Oracle SQL, MongoDB
Architecture & APIs: RESTful APIs, MVC, Layered Architecture, Repository Pattern, Service Layer, JWT Authentication
Cloud & Deployment: AWS EC2, S3, RDS, Amplify, CloudFront, DynamoDB, ECS, Elastic Beanstalk, Docker
Developer Tools: Git, GitHub, Docker, Swagger, Visual Studio, VS Code, Postman
